RELEVANT EMPLOYMENT HISTORY

STUDENT SERVICES ADMINISTRATOR
Faculty of Arts, Macquarie University
July 2019 - Present

- Providing face to face support, phone consultation and responding to online enquiries in a timely manner
- Working through complex issues with tight deadlines
- Cross-functional collaboration with other teams across the university to manage and resolve complex student enquiries

FACILITIES ASSISTANT / CONCIERGE ASSISTANT
Faculty of Arts, Macquarie University
December 2015 - Present

- Supporting staff through organisational and technological change and assisting with the large-scale relocation of staff
- Working with a high level of autonomy to meet deadlines
- Recruitment, selection and training of new facilities assistants
- Designed and implemented processes and functions for a newly created Concierge role

CO-FOUNDER
Heli Labs
December 2018 - February 2020

- Concentrated on the development of an operating system designed to run seamlessly across architectures and platforms based on FreeBSD
- Devised creative solutions to significant problems through client discussion, industry, user and technical research

PROJECTS

PORTFOLIO SITE
HTML, CSS, Netlify

My first attempt at creating a static portfolio site using the skills I learned in the first month of learning to code. The site is designed to be easily modified and features responsive design to accommodate different screen sizes.
github.com/theandrewfulton/assignment-portfolio-site

DAILY TASK TRACKER
Ruby

Written in Ruby, this command line application helps you create and keep track of activities you would like to do every day that might form part of a larger goal, visualising progress throughout the year with the help of Ruby Gems.
github.com/theandrewfulton/terminal-app

FRESH LOCAL MARKETPLACE
Ruby on Rails, PostgreSQL, Heroku, TailwindCSS

A two-sided marketplace project that I found extremely challenging. Fresh Local features user management and permissions, integration with Pusher for instant messaging and Stripe for payments.
